

CORE™ SERIES

Framed Interior Signage with Modular Insert Options

Interchangeable Solution for Interior ADA Signage

LETTERMANS

Core™ is Lettermans' modular framed signage system offering a polished, interchangeable solution for interior ADA signage. With a variety of aluminum frame profiles and your choice of tactile insert (Forma™ or Etch™), Core™ gives clients flexible design control while keeping a consistent visual system. Whether you're outfitting a single building or an entire facility network, Core™ provides a polished, durable signage solution that adapts to your project's needs - visually and functionally.

KEY FEATURES

- ▶ Aluminum frame profiles available in multiple finishes, depths, and mounting configurations
- ▶ Compatible with Etch™ (photopolymer) and Forma™ (3D printed) tactile inserts
- ▶ Offers multiple design styles to match brand and interior architecture
- ▶ Insert system allows for easy updates, replacements, or tenant turnover signage

PRODUCT HIGHLIGHTS

Complete Interior Sign System

From Room ID to Restroom and Exit signage, Core™ supports every ADA sign type in a consistent, framed format. Ideal for facilities seeking visual alignment across a full interior package

Insert Flexibility

Mix and match Etch™ or Forma™ inserts based on your design intent or durability requirements - without changing the overall frame system.

Frame Variety

Choose from a curated selection of modern aluminum frame profiles - available in multiple finishes to complement your interior materials and aesthetics.

Systematic and Scalable

Perfect for corporate campuses, educational institutions, healthcare systems, or multi-tenant buildings. Core™ signage simplifies specification and standardizes compliance across any footprint.
