

FORMA™ SERIES

3D Printed ADA Signage with Dimensional Impact

Engineered for Interior Spaces

LETTERMANS

The Forma™ Series is Lettermans' 3D-printed ADA signage solution, engineered for interior spaces that demand both compliance and visual distinction. Built using advanced UV-cured layering and eco-conscious inks, Forma™ signage combines tactile clarity, brand flexibility, and aesthetic appeal - all in one seamless fabrication process.

Ideal for corporate offices, creative environments, and modern public facilities, Forma™ brings architectural design and ADA functionality together in a single platform.

KEY FEATURES

- ▶ Raised tactile graphics, Grade II Braille, and multi-color finishes printed in one step
- ▶ Zero-VOC UV inks for durability, sustainability, and indoor air safety
- ▶ Design style library supports brand expression and architectural alignment
- ▶ Works across individual signs or full facility signage packages

PRODUCT HIGHLIGHTS

Designed for Modern Interiors

Forma™ signage enhances branded environments, creative spaces, and contemporary buildings with dimensional, tactile-rich signage that complements design intent.

Comprehensive ADA Coverage

All sign types are produced to meet ADA standards for tactile readability, contrast, Braille accuracy, and surface finish - ensuring full code compliance.

Flexible Design Styles

Forma™ offers a growing catalog of design themes that apply seamlessly to every sign type, making it easy to maintain visual consistency across projects.

Built to Last

Durable, abrasion-resistant surfaces and environmentally friendly UV inks make Forma™ signs tough enough for everyday use - and safe enough for any indoor setting.
